

Drew Funderburk

Breckenridge, Texas

drew.funderburk.personal@gmail.com | LinkedIn

Experienced developer with over 4 years in the Video Game Development and Entertainment industries, specializing in programming and collaboration with content creation teams. Proven ability to lead technical development as a Freelance Developer, with additional expertise gained as a Game Programming Instructor and VR Developer. Strong alignment with gameplay programming responsibilities through hands-on experience in game development.

WORK EXPERIENCE

Self-Employed

Freelance Developer

2025 - Present

- Identified recurring technical debt in legacy client projects and proposed refactoring strategies to reduce long-term maintenance overhead.
- Led programming teams, designing and implementing project architecture as well as working closely with clients to shape gameplay features to the project's vision.
- Worked with clients to design experiences from the ground up to fit their unique vision, emphasizing marketability, playability, and "finding the fun" in their ideas.
- Led development on the technical front, setting milestones and ensuring client expectations and timelines are met.

ACADEMY OF INTERACTIVE ENTERTAINMENT

Game Programming Instructor

Lafayette, LA | 2023 - 2025

- Partnered with fellow instructors to refine curriculum for cross-disciplinary engine modules, ensuring student teams were guided by industry-aligned pedagogy
- Instructed students in programming fundamentals, C++, C#, AI decision making, UI, Unity, Unreal Engine, game math, custom engines, physics, and rendering techniques
- Guided student teams through agile workflow, and standard studio development pipelines, maintaining a 92%+ class average

TOP RIGHT CORNER

VR Developer

2022 - 2024

- Designed and created VR/AR systems for commercial and educational applications, developing gameplay, AI, UI, lighting, and maintaining optimization for limited hardware
- Developed "Flock of the Low God", a horror VR experience
- Created VR training applications for Louisiana Economic Development and the University of New Orleans

SKILLS

Languages: C#, C++, JavaScript, Bash, Lua
